Installing the Haskell Platform

Follow the instructions at: http://www.haskell.org/platform/

**Mac:**
The following command will install the Haskell platform.
$ curl --proto '=https' --tlsv1.2 -sSf https://get-ghcup.haskell.org | sh

For any prompt that asks you YES or NO, type YES and press enter.

After the installation is done, restart your computer (this is just to make sure that the terminal is properly restarted). Open a terminal and execute the **ghci** command.

**Windows:**
Follow the multi-step instructions given on http://www.haskell.org/platform/.
